Release Notes: Implementation Information 1.5

General

- As from 31/01/2024, in the context of the implementation of the SSO, new technical contact with 'API User' role should be setup and used to run automatic downloads.
- The authentication is now using client ID and client server via the OAuth2 protocol. A new URL is set for the authentication endpoint : https://login.microsoftonline.com/4b81df1d-187a-47ef-a0b4-df7556124bc8/oauth2/v2.0/token
- The endpoint URLs of all downloads is changed. Base URL of the endpoints to download reported is now : https://apigateway.portalextranet.bsys.flbe.fluxys.com/

Please refer to the technical documentation for full description.

NB : User created in the legacy User Administration system before 31/01/2024 will still be active and eligible for authenticating and running the automatic downloads. A transition phase is foreseen to migrate to the new SSO users created in the Fluxys Group CRM Platform.
